Profile

Senior full-stack engineer with over 7 years of experience building production SaaS platforms. Deep Node.js / MERN focus (Express, NestJS, Next.js, React, MongoDB, Supabase, PostgreSQL) with strong Ruby on Rails background. Track record across multi-tenant SaaS, AI-integrated apps (OpenAI GPT-4.1, Whisper), real-time systems (Socket.io, BullMQ), and e-commerce integrations (Shopify, Stripe, Amazon).

Work Experience

DevHouse – Faisalabad

April 2021 – Present

Senior Full Stack Engineer (Node.js / MERN & Ruby on Rails) – <https://devhouse.co/>

- **VetPA — AI-Powered Veterinary SaaS — Full-Stack Developer — <https://vetpa.ai/>**

Tech Stack: Node.js, Next.js 15, React 19, TypeScript, PostgreSQL, Prisma, OpenAI GPT-4.1, Stripe, JWT, Nodemailer, node-cron

Overview: Built an AI-powered veterinary clinic management platform with clinical journaling, patient records, subscriptions, and automated workflows. Integrated GPT-4.1 for journal auto-fill, audio transcription via Whisper, and patient profile extraction with bilingual support (English/Danish). Implemented Stripe billing, role-based multi-tenant architecture, JWT auth, and the clinical dashboard with auto-save.

- **Cuentto — Full Stack Developer — <https://cuentto.com/>**

Tech Stack: Node.js | PostgreSQL | Prisma | Next.js | React 19 | TypeScript | Socket.io | Tailwind CSS 4 | Shadcn/Radix UI | TinyMCE | Lottie React | Framer Motion | Zod

Overview: Cuenttos is a wellness-focused writing platform combining mindfulness meditation, expressive writing, and mood-aware content sharing with real-time notifications. It features Socket.io live notifications, emotion-based reactions, guided breathing exercises, and a privacy-first group sharing model. As a full-stack developer, I built the real-time notification system, feed algorithm, multi-step writing experience, and the mindfulness meditation page with music integration.

- **Real Intent — Lead Generation SaaS — Frontend Developer**

Tech Stack: Next.js 15, React 19, TypeScript, TanStack React Query, Axios, Pipedrive API, iClosed, Material-UI, Framer Motion

Overview: Built a lead generation and growth marketing automation platform for real estate agents. Developed the zipcode availability checker for exclusive territory assignment, integrated Pipedrive CRM for lead capture, and built the marketing landing pages with multi-channel campaign onboarding (social videos, Meta/Google ads, newsletters).

- **Azka Basket — Organic Food E-Commerce — Senior Software Engineer**

Tech Stack: Ruby on Rails, Devise, HTML, CSS, Bootstrap

Overview: Built the CMS panel and the weekly delivery automation cycle for an organic food platform partnering with regional farmers. Implemented the automated produce-delivery scheduler that resets at the start of each week.

TRACE 3D – Remote

April 2025 – April 2026

Senior Frontend Engineer – <https://studio.trace3d.app/>

- **TRACE — Browser-Based 3D AR/XR Authoring Platform — Senior Frontend Engineer**

Tech Stack: React 18, TypeScript, Vite, Babylon.js, Zustand, Stripe, HeroUI, TailwindCSS, Framer Motion

Overview: Built and maintained the React-based studio interface for a browser-native 3D AR/XR content creation platform. Integrated the Babylon.js 3D viewer, implemented complex Zustand state management, and built composable behavior editing systems for animations, materials, and interactions.

- **GroovePacker (Legacy) — Multi-Tenant Fulfillment SaaS** — *Senior Backend Developer*

Tech Stack: Ruby on Rails, MySQL, Redis, Go (rules microservice), Shopify GraphQL, Amazon MWS, Stripe, Doorkeeper, Apartment, Devise

Overview: Built core APIs for an enterprise multi-tenant SaaS aggregating orders from 9+ sales channels. Developed the multi-tenant architecture (Apartment), background job pipeline for order imports and inventory sync, and the rules-microservice bridge to a Go service. Hardened OAuth flows with Doorkeeper and Stripe billing for tenant subscriptions.

- **GroovePacker GP-Lite — Shopify Embedded App** — *Full-Stack Developer*

Tech Stack: Ruby on Rails, React 18, TypeScript, PostgreSQL, Redis, AWS S3, Shopify App Bridge, Shopify RecurringApplicationCharge, WickedPDF

Overview: Built a Shopify embedded order-fulfillment app (live on the Shopify App Store). Implemented Shopify App Bridge, subscription billing via RecurringApplicationCharge, in-admin barcode scanning, custom label generation, and packing-slip printing via WickedPDF. Owned the React-on-Rails frontend and Shopify session/token auth.

Equipe Technique (ETQ) – Remote

August 2022 – August 2024

Senior Ruby on Rails Developer

- **Becomy — Multi-Tenant E-Commerce SaaS** — *Senior Software Engineer* — <http://becomy.com/>

Tech Stack: Ruby on Rails, React, AvoHQ, Stripe, Devise, Multi-tenant, TinyMCE, TailwindCSS

Overview: Built a low-cost Shopify alternative with multi-tenant subdomain-based storefronts and full e-commerce flows (products, variants, inventory, orders, checkout): Integrated Stripe and the AvoHQ admin panel.

Technical Skills

Backend: Node.js, Express.js, NestJS, Ruby on Rails, REST APIs, GraphQL

Frontend: React, Next.js, Redux Toolkit, Zustand, TanStack React Query, RxJS, TailwindCSS, MUI, Shadcn/Radix UI, Framer Motion, Socket.io

Databases: Supabase, MongoDB, PostgreSQL, MySQL, Redis, Prisma, Mongoose

Cloud / DevOps: AWS (S3, EC2), Google Cloud Platform, Vercel, CI/CD

Integrations: Stripe, OpenAI GPT-4.1, Whisper, Shopify (App Bridge, GraphQL), Twilio, Pipedrive, Jira, BullMQ, SendGrid

Version Control: Git, GitHub, GitLab

Education

National University of Computer & Emerging Sciences (FAST-NUCES)

2014 – 2018

Bachelor of Science in Computer Science

Languages

English (B2 - Upper Intermediate) | Urdu (Native)
